

Marine & Industrial Electrician or Technician

About Ikonika Corporation

We are a full-service control system integrator delivering complex automation solutions. We have comprehensive in-house capabilities through the full project lifecycle, including design, programming, panel manufacture, commissioning and in service support, all from our Fife, WA facility.

The origins of our business and the foundation of our expertise is in marine controls and automation, across the full scope of vessel systems. From this beginning, we have developed to become recognized throughout the international fishing industry as the go-to control systems team for seafood processing, in vessel and shore-based factories. This process control expertise is leading to projects across the food and beverage sector, including bottling facilities with a focus on high-availability equipment updates.

About the role

The Electrician will join our existing team in support of business growth. This is a role with a dual focus on building new panels and providing on-site support to our customers.

Each day will look quite different for you. You could be on a customer's ship in Alaska, a factory in Bellevue or in our panel shop in Fife. It is important that you enjoy variety, which will include;

- Manufacture of control panels in our UL508 certified shop. You will be installing, wiring, and testing electrical components to drawings provided by the Ikonika engineering team.
- Installation and commissioning of Ikonika SCADA system hardware and automation control panels on customer sites, including factories and ships.
- Troubleshooting and performing routine maintenance on electrical systems, including PLC, I/O modules and VFDs.

About you

You will see from the below that we are open minded about how you arrived where you are, but you need to be a meticulous, hard-working, collaborative soul with real electrical expertise, looking to put your weight into developing Ikonika with us!

You will become part of our customer-facing team and it is important that you help us maintain the excellent reputation we have with our customers.

Essential Qualifications and Experience

- Experience of building, installing, maintaining, or troubleshooting electrical systems.
- Able to read electrical engineering drawings, including schematics.
- Experience using professional handheld metering devices.
- Ability to use hand and power tools.
- Strong problem solving and critical thinking skills.
- A commitment to safety. This is non-negotiable for the industries that we operate in.
- Compete adherence to quality standards and regulations.

Desired Qualifications and Experience

- Experience working with SCADA system hardware, including PLC, I/O and VFD.
- Experience as a Marine Electrician, working on large ships.
- Experience as a maintenance technician in a facility with SCADA systems.

Requirements

- Already authorized to work lawfully in the United States.
- Valid Driver License.
- Must be able to lift 50lbs.

Pay & Benefits

Our competitive pay package includes medical benefits, paid holidays, paid time off, 401k.

Location

Based in our Fife, WA headquarters or Seattle, WA.
